CONCEPT

Status: Ongoing
Team; Tom Bowman, Aden Kumary

Nestled alongside the tranquil Kirichwa River and positioned along Kileleshwa's primary thoroughfare, Enrogue is strategically situated at the heart of Nairobi's bustling nexus. Mere minutes away from prominent city districts like Westlands, Lavington, and Kilimani, this prime location also boasts close proximity to renowned eateries, lively bars, and chic boutiques that define Nairobi's urban landscape.

Enrogue comprises 1 and 2 bedroom apartments spanning 18 floors, culminating in rooftop entertainment terraces that afford sweeping vistas of the city's vibrant pulse, creating an elevated experience amidst Nairobi's dynamic urban life.

RITEP- TRADE FAIR & EXHIBITION PARK
KIGALI-RWANDA

CONCEPT

The Rwanda International Trade and Exhibition Park endeavours to position Kigali City as a premier exhibition centre. Its innovative design allows for versatile utilization beyond trade fair seasons, transforming the trade fair halls into integrated landscape features accessible to the public year-round. Inspired by Rwanda's iconic hillside vistas, the design features three sets of halls arranged in ascending tiers, evoking the country's distinctive topography (rolling hills). With elegantly curved roofs, these halls serve as an emblematic landmark within Kigali's hills.

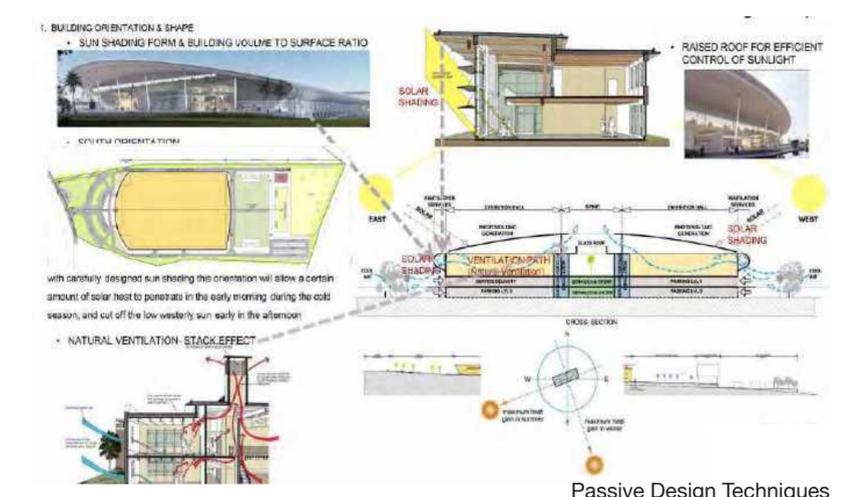

This development caters to a spectrum of needs, offering expansive exhibition spaces, conference facilities, restaurants, and over 2000 parking spaces. Additionally, plans include a luxurious 5-star hotel and provisions for future expansion. Embracing sustainable practices, the design integrates passive cooling techniques and harnesses solar energy to minimize reliance on active cooling systems, aligning with environmentally conscious principles.

AMBASSADEUR APARTMENTS
JUBA-SOUTH SUDAN

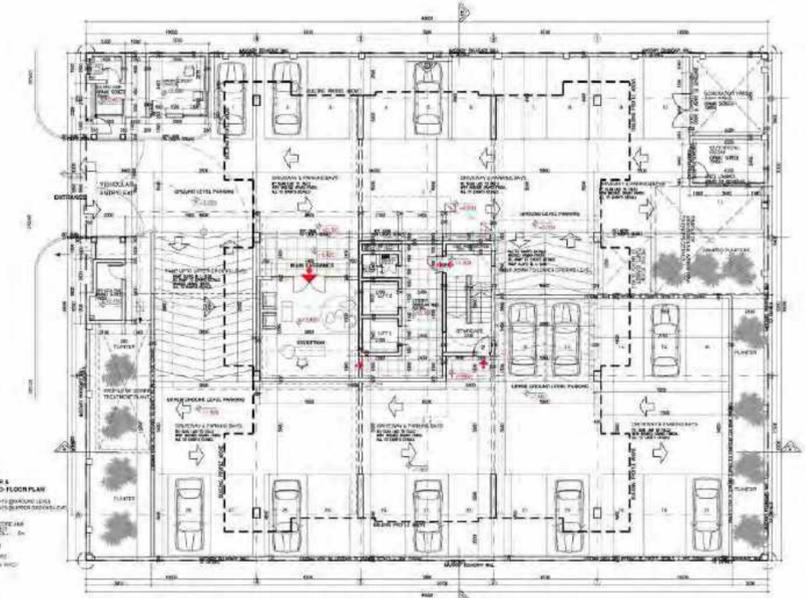

CONCEPT

Nestled within the vibrant core of Juba, South Sudan, a contemporary apartment complex emerges, embodying the city's rapid evolution towards opulent living spaces.

Comprising 36 units, each exquisitely designed to offer panoramic views through floor-to-ceiling windows, this development harmonizes luxury with sophistication. An array of amenities, including backup generators, a rooftop clubhouse, a state-of-the-art gym, and a refreshing swimming pool, elevate the resident experience.

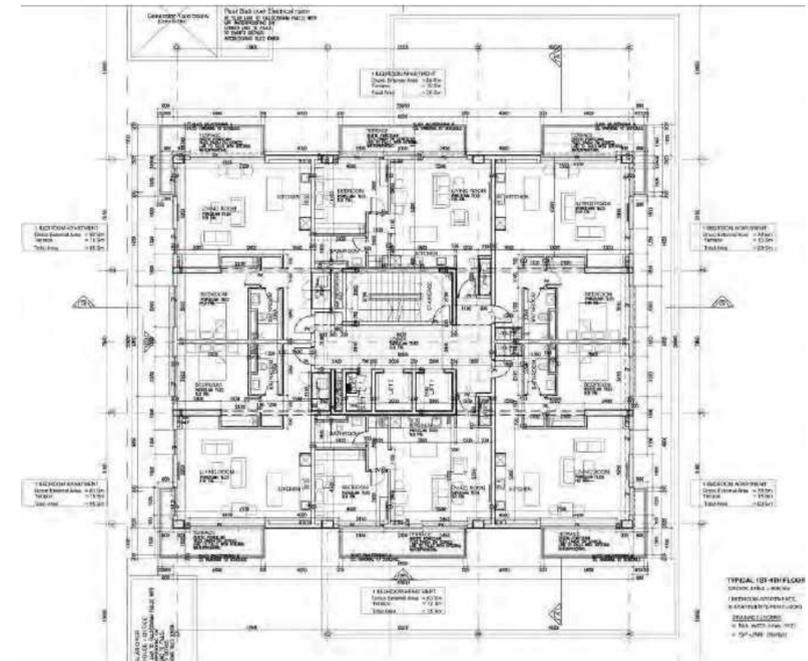

The expansive balconies, designed to shield the interiors from intense tropical sunlight, also serve as serene spaces for showcasing seasonal blooms, adding a touch of natural beauty. Ensuring safety, the complex is fortified by a secure boundary fence and proudly stands as one of the select developments equipped with a borehole, prioritizing self-sufficiency in water supply.

LUMIERE, SCHOOL LANE WESTLANDS
NAIROBI, KENYA

CONCEPT

Status: Ongoing

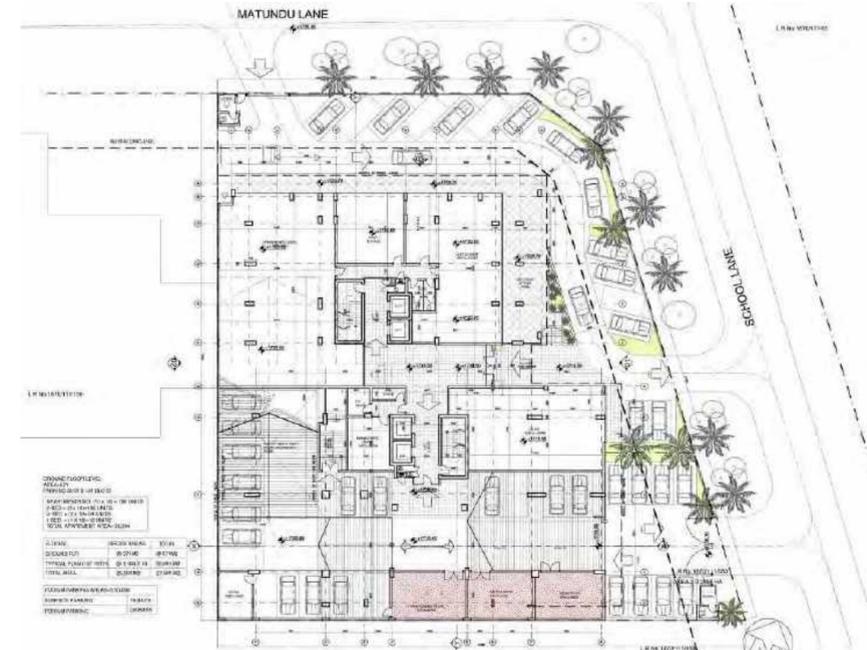

Architect; Tom Bowman, Aden Kumary

In a prime spot along School Lane in Westlands, Lumiere stands poised to become a sought-after destination, mere moments away from an array of exceptional dining spots, bustling shopping centers, entertainment hubs, and commercial hotspots.

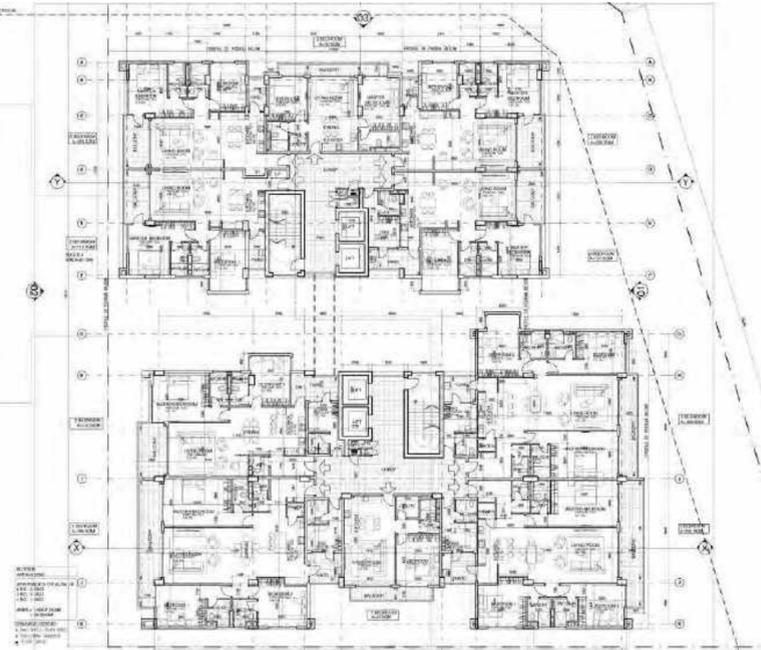

Its awe-inspiring architecture embraces expansive 1, 2, and 3-bedroom residences that soar above an impressive ground-level shopping emporium. Crowning this marvel will be a panoramic sky deck, offering a wealth of executive amenities and breathtaking vistas. A meticulously crafted sanctuary designed to complement the refined and discerning lifestyle awaits within Lumiere's walls.

MINING CORPORATION HEADQUARTERS
JUBA-SOUTH SUDAN

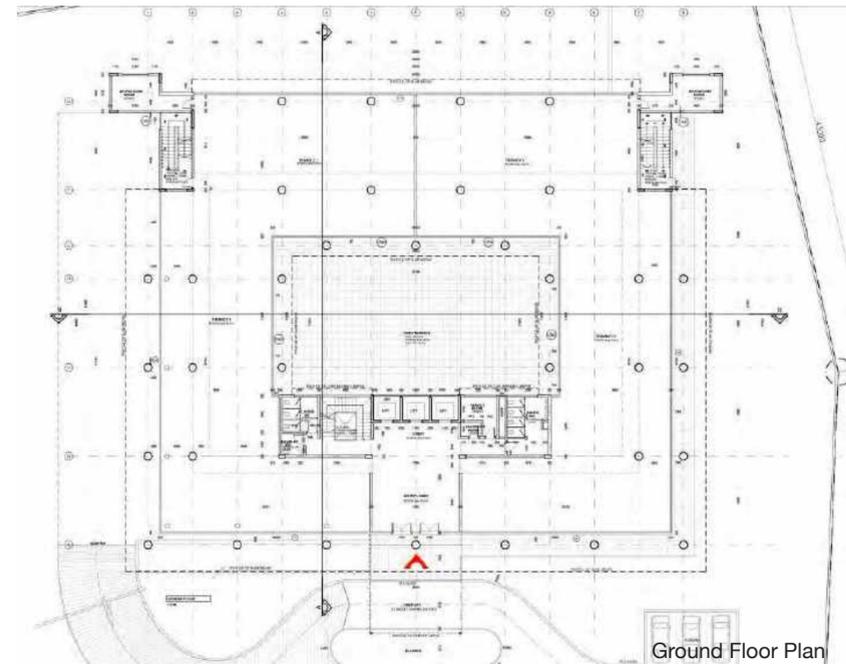

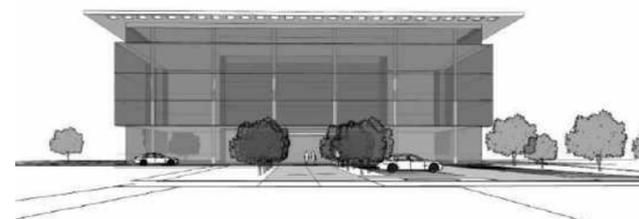

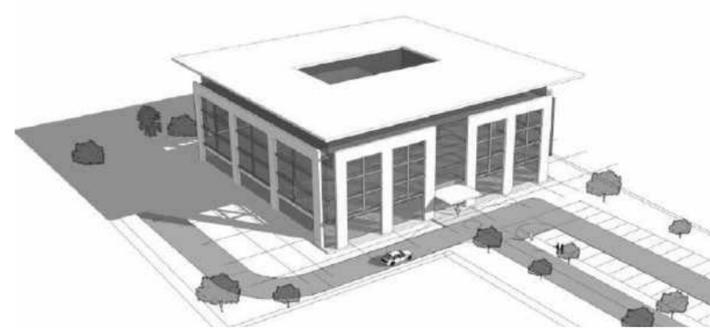

CONCEPT
Status: Ongoing
Tom Bowman-Senior Architect
Aden Kumary-Project Architect

In Juba, South Sudan, a cutting-edge office structure emerges as a beacon for the country's architectural evolution, particularly in the corporate realm. This sleek edifice, designed for a forward-thinking mining corporation, mirrors the organization's commitment to transparency and modernity. Its design philosophy centers on openness and functionality. The building's striking appearance features a floating box design complemented by a deep concrete wraparound, strategically shielding against the intense high-altitude sun. At its core lies a vibrant green courtyard, fostering a continuous flow of cooled air, courtesy of the lush tropical foliage adorning the space. This harmonious blend of nature and architecture not only enhances aesthetics but also promotes a sustainable and refreshing atmosphere within the building. This landmark structure epitomizes the essence of a contemporary office space, setting a new benchmark and steering the course for future office developments in Juba, marking a progressive direction for architectural endeavors in the city.
